DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1, lines 13-14, "input **rectangular** waveguide" has been changed to -input **circular** waveguide--.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a non-rotating electrodeless high-intensity discharge lamp system using circularly polarized microwaves having, inter alia, an elliptical waveguide linearly connected to the rectangular waveguide such that the major axis of the elliptical waveguide is rotated to a predetermined angle relative to a horizontal surface of the rectangular waveguide with one or more stubs inserted in the elliptical waveguide (claim 4); or an elliptical waveguide linearly connected to the input circular waveguide such that the major axis of the elliptical waveguide is rotated to a predetermined angle relative to a horizontal surface of the input (rectangular) circular waveguide linearly connected to the first rectangular waveguide (claim 1). The remaining claims 2, 3 and 5 are allowed by virtue of their dependencies on the independent claims. Hence, the examiner has allowed claims 1 through 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Stevens et al., Patent No. 5,111,111 ; MacLennan et al., Patent No. 6,137,237.

None of the above patents discloses the non-rotating electrodeless high-intensity discharge lamp system as recited.
